Sicis was founded in 1987 and soon became worldwide leader in the mosaics production, making prestigious international projects in the contract and residential sector.

Thanks to its unique works and collections, the mosaic is transformed from a simple covering into a communication tool, an expression of trends.

In line with this dynamism, the company takes a wider and more complete path.

New coating materials are introduced on the market. Last of these Vetrite, an innovative product with an aesthetic content that makes it suitable for many uses and interpretations.

At the same time, in a strategic brand extension, it enters the world of interior design and furniture with the SICIS Home Collection division, The Next Art, a well-rounded lifestyle project.

The Next Art collections are refined and cozy at the same time, luxury that also means comfort. Sicis looks at the harmony of the space and each element determines the elegance of the ambience as a whole. The furnishings are combined with artistic mosaic panels, or with Vetrite wainscoting by Sicis, in other cases the walls are adorned with tapestries of Sicis Textyle limited edition line, as well as the ceilings and floors, the lights, up to doors.

The Company works on quality, from the choice of materials, to production systems, in every working phase, down to the smallest detail and collaborating only with artisans and experts who respect the best working traditions, able to give life to wanted objects and exclusive room.

Each project can be completely customized and realized from the start to the finished execution.

SICIS[®]
FACTORY

Since the color is produced by the melting of natural materials - some of them highly unstable - the difference in tone between the samples and as ordered can not be contested. It is also understood that shade variations, small chippings, planar imperfections and slight difference in thickness are characteristics of the product and of the production process.
